INTERNATIONAL RECOGNITION FOR COMMITMENT DURING PRACTICAL SEMESTER

26 FEBRUARY 2026

A special award for a student at Ansbach University of Applied Sciences: Kamila Karolina Slabicka, who is studying Industrial Biotechnology (IBT), was honoured with the Outstanding Student Award from the Wrocław University of Environmental and Life Sciences.

As part of her practical semester, she worked on the research project 'FlavorFerm: Unleashing the flavour potential of plant-based foods via fermentation'. She received this special recognition for her significant contributions to the development of new food products based on lupins.

During her project work, she acquired comprehensive knowledge of analytical methods and independently developed several procedures for characterising the raw material. In doing so, she made a significant contribution to innovative, plant-based food development.

On 13 February, she was presented with the award in a ceremony by Dean Barbara Żarowska at the Wrocław University of Environmental and Life Sciences.

Ansbach University of Applied Sciences congratulates her on this special award and international success.
