

# HOCHSCHULE ANSBACH

## COMPANIES@CAMPUS 2026 WAS A BIG SUCCESS!

This year's **Companies@Campus**, the yearly job fair at the Ansbach University of Applied Sciences, was a big milestone for all international students, the companies and the Welcome Center alike.

The job fair, with more than 50 local companies, was the perfect chance to find internships, jobs and connect with future employers. Our **international students** were also able to **introduce themselves, network with industry leaders and gain insights into the German job market.**

In addition, the Welcome Center offered a **program specifically catered to all international students:** keynote speeches prepared the students for the German way of networking and shed light on the application process in Germany. Of course, small goodie bags were prepared for the occasion.

In addition, the local immigration office and employment office offered **private counselling** for all further questions, as well as a **public Q&A session.** Lastly, the media faculty and several students volunteered to take professional application pictures, which will surely help the international students find their perfect job.

**A big thank you to all companies, the immigration office and employment office of Ansbach, all photographers and every student that joined our programs!**  
**Thank you for a successful international Companies@Campus!**
